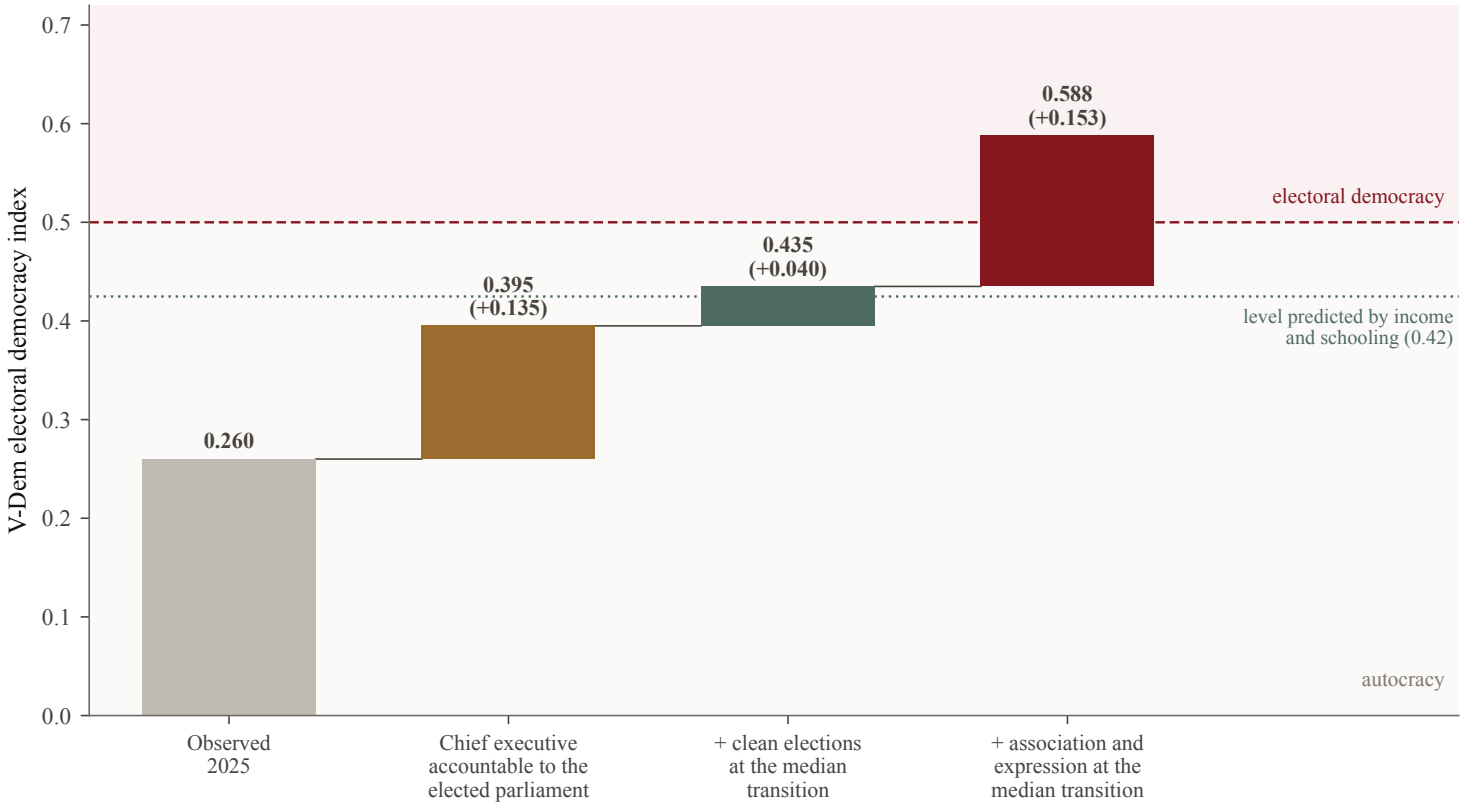
**Figure 24.** The parliamentary-monarchy arithmetic: one institutional change takes Morocco from 0.26 to 0.40; freedoms at the level typical of new democracies take it past the 0.5 democracy threshold



Exact recomputation of V-Dem's formula, index = ½·(product of the five components) + ½·(⅛ elected officials + ¼ clean elections + ¼ association + ⅛ suffrage + ¼ expression); it reproduces the published 2025 index at r = 0.9993. Morocco's multiparty (3.38) and free-and-fair (2.14) election indicators already clear the RoW threshold of 2. Source: V-Dem v16.
