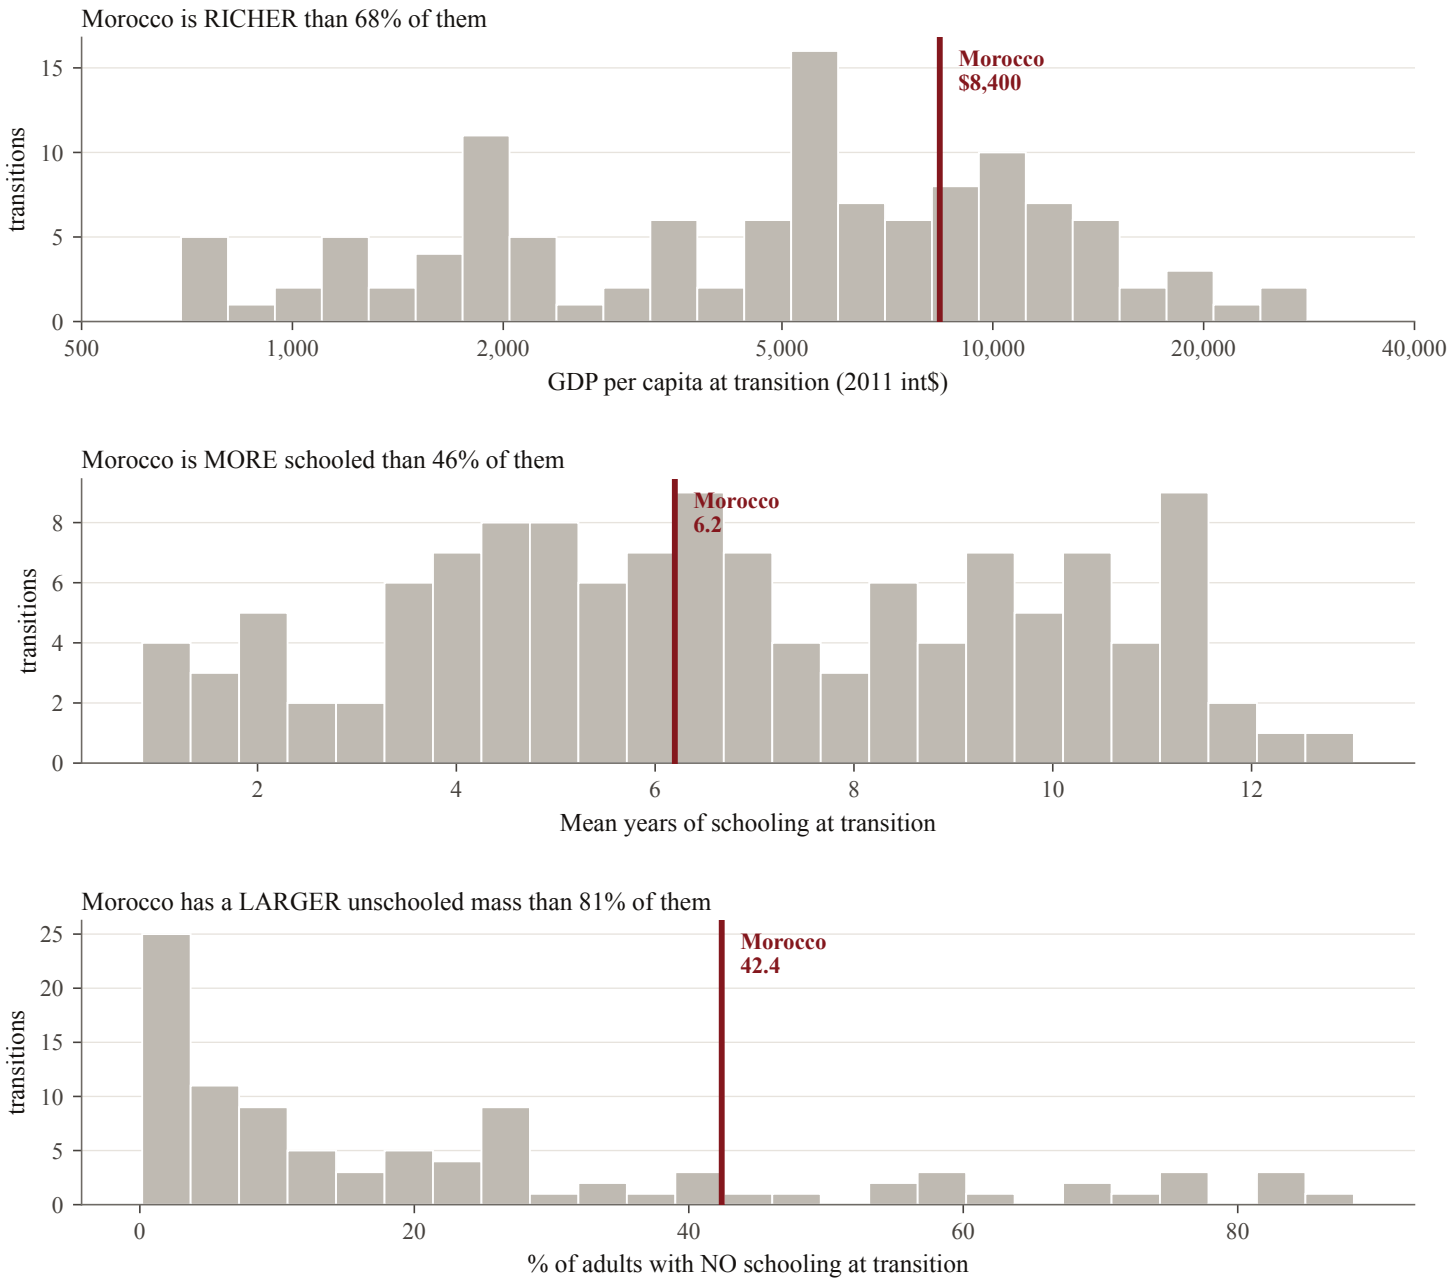
Figure 3. Morocco's income is unexceptional, its mean schooling is average — but its unschooled adult population is in the top quintile



Distribution across all 144 democratic transitions, 1960–2025. Morocco: GDP 2022 (Maddison); mean schooling 2023 (UNDP); share with no schooling 2015 (latest Barro-Lee; a linear extrapolation of the 2000–15 trend gives ~33% for 2024).
