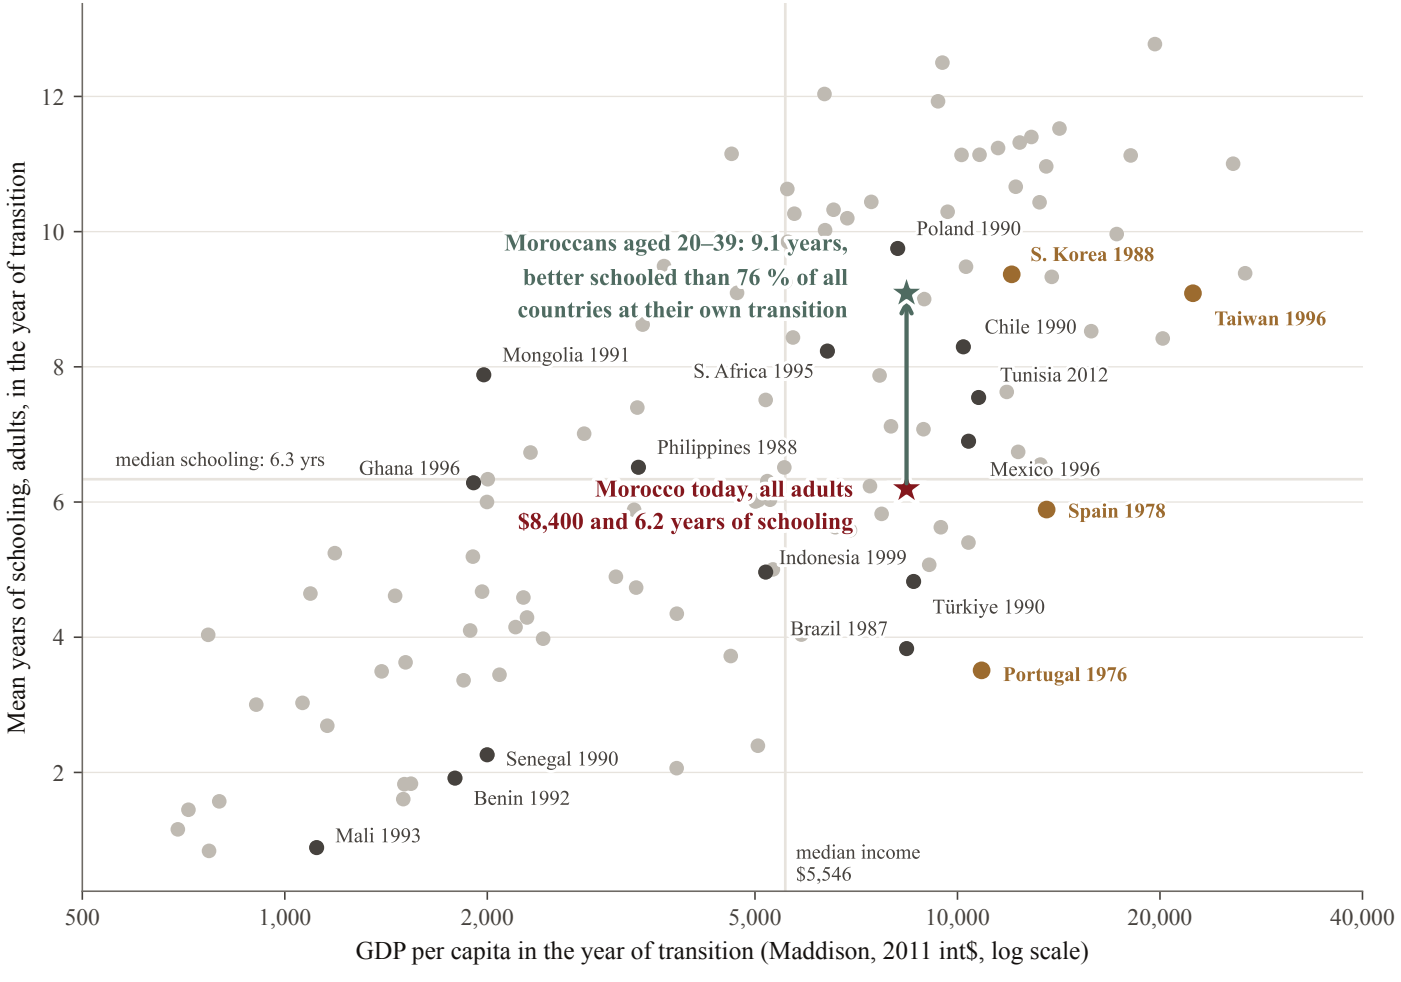

Figure 2. Morocco already exceeds the typical country at the moment it democratised — and its under-40s sit where South Korea and Poland did. 115 transitions, 1960–2025

Each dot is one transition from autocracy to electoral democracy (V-Dem Regimes of the World). Highlighted: the four 'third wave' cases most often compared with Morocco. The second Moroccan marker holds income fixed and replaces the adult stock with the 20–39 cohort (Wittgenstein Centre v3.3, 2025). Sources: V-Dem v15; Maddison Project 2023; Barro-Lee v3 (ages 25–64) / UNDP.
